Company:	QA Academy
QA manager:	Polina Mamchits
QA engineers:	Natallia Lakutsevich

Additional information

Testing dates:	11.04.2022 - 21.04.2022
Time spent:	36 hours

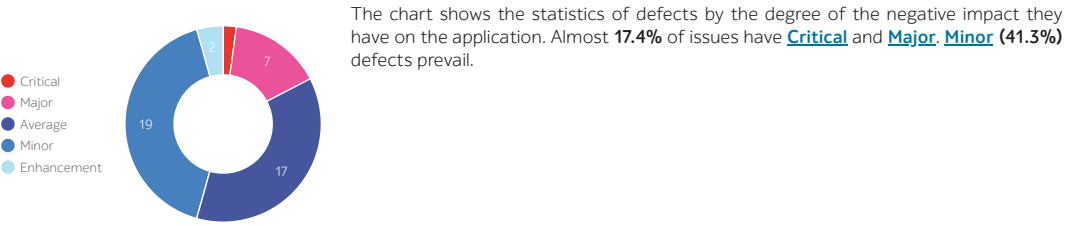

Product version: 2.0

General quality analysis

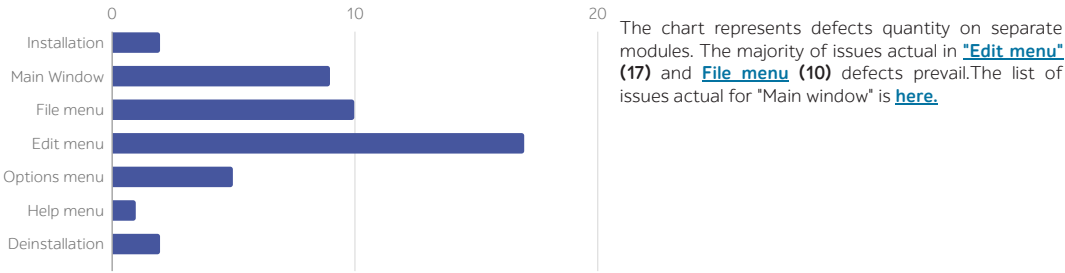

The overall quality of the application can be estimated as **Low**. The total number of defects is **46**. Functional defects prevail, **1** of them has the Critical severity and **7** defects gain to the Major defects. The majority of issues is concentrated in [File menu](#) module. Besides there are some issues in [Installation](#) and [Deinstallation](#) modules. A detailed quality analysis is presented below.

Detailed quality analysis

The total number of defects by severity

The total number of defects by of modules

Quality of separate modules

Module	Quality	Comments
Installation	Low	The quality of this section can be estimated as Low. 2 defects were found here. The most notable defects are that there is no licening agreement(QATC-565785) and there is no language installation(QATC-576480).
File menu	Low	The quality of this section can be estimated as Low. 10 defects were found here. The most notable defects are that the pictures are not converted and archived into a zip-file when the user creates gallery(QATC-574399) and The number of displaying pictures in the window is less than the number of pictures in the selected folder (QATC-576331) . Another issue (QATC-574401) is that a target file is saved in the system folder of the application when the user creates gallery. Besides Max filesize for big picture is more than 100kb after creating gallery (QATC-576257).The list of the issues actual for module is here .
Edit menu	Low	The quality of this section can be estimated as Low. 17 defects were found here. The most notable defect is that the pictures are deleted from selected folder when the user deletes selected thumbnails from the main window of the application(QATC-573025). Also it is impossible to set sharpness,brightness,contrast,red-eye reduction and auto-optimize (QATC-574620 , QATC-574628). Also 4 GUI issues were found .The list of the issues actual for module is here .
Options menu	Low	The quality of this section can be estimated as Low. 5 defects were found here. The most notable defect is that the dimensions are not applied by default and it is possinle to change(QATC-576066 . Besides german language is not supported by the application. Also Logo (external png-file in program directory) is not added to big-version of the pictures located right top because of the direct path to the logo of the society is not defined in the Path KWICKI-Logo field(QATC-576452). The list of the issues actual for module is here .
Help menu	Low	The quality of module is estimated as Low. The list of the issues actual for this module is here .
Deinstallation	Low	The quality of module is estimated as Low. In this section 2 defects were found. .The list of the issues actual for this module is here .
Main Window	Medium	The quality of this section can be estimated as Low. 9 defects were found here. The most notable defects are that there is no toolbars(QATC-572876) and that the confirm message box does not appear when the user clicks the Close button of the application (QATC-572929) . The enhancement (QATC-576121) is that possiblility to select multiple pictures using mouse click or by hot keys which could help to make the application more user-friendly. The list of the issues actual for module is here .
